Release Notes

Pukka-J DICOM Explorer 6.2.4

(Released 09/01/2019)

Modality Code From Exam Code

Modification to look up the modality code from the exam code if the value we have got for the modality isn't a primary modality code.

Worklist Query Wildcarding

Report worklists auto-wildcard the name search but add a * in front of the name which is not efficient. Most queries search for surname, so just the end is now wild-carded. Any spaces are replaced with ^.

Patient Phone Number Search

Added phone number to the minimum query params on the HI7PatientList so that users can search by just phone number for a patient.
