Release Notes

Pukka-J DICOM Explorer 6.2.7

(Released 21/06/2019)

Auto Sending Referral Email

Changed the default setting for sending emails when a report is received. It was true, now false.

PJREF HL7 Segment Type

Modified the custom HL7 segment type of PJREF to be just REF so that it was 3 characters in keeping with the rest of the segment types.

HL7 ORU to DICOM SR Report Time

Modified the way in which the series date and time are added the DICOM SR. A HL7 mapping was used by default. If now mapping is now present, the default is to use the current date and time.

Superseded DICOM SR to ORU

Fixed an issue whereby a HL7 ORU message was being generated and a superseded report was stored.
