Release Notes

Pukka-J DICOM Explorer 6.6.0

(Released 21/10/2025)

C-GET Changes

There was a compatibility issue between the fetchFiles for performing a C-GET when connecting to a Nexus proxy or other standard C-GET providers. A missing “extras” map could cause an exception when trying to retrieve at series and study level when attempting to read the a DICOM Charset from the Map.

The check for an external supplier has been updated to take into account that Nexus and the ncse library share a common DICOM prefix.
