Release Notes

mint.jar 1.19.00

(Released 22/11/2019)

Database Node – Reconciling Demographics

Add the ability to set the database node to update the DICOM header with the primary demographics from the database. Any files that are retrieved via a database node set to reconcile the data will have the DICOM header updated with the database values as they are read from disk before being sent passed to the node handling the retrieve request.
