## Release Notes

### **mint.jar 1.22.05**

(Released 21/10/2020)

#### **DICOM File Input Nodes – ZIP Reading**

Updated the DICOM file input nodes to handle zips. Reworked the file processing to use an input stream rather than the file paths and treated each zip entry as an input stream.

#### **DICOM Tag Mapper – NOT IF Rules with Missing Tag**

Fixed a bug with NOT IF rule checking that would fail to match if the tag was missing.

#### **Node Status**

The parent process node overrode the Node getStatus method, which meant that if a node didn't specifically override the method, the node status would not be sent and therefore not displayed in the network UI.
