mint.jar 1.22.06

(Released 16/11/2020)

DICOM Protocol Splitting

The DICOM stream splitter has been updated to allow the different protocols to be passed to different branches in the pipeline. i.e. query/retrieve can be passed to one branch, with CSTORES to another and worklist CFIND to another.

The user interface for defining multiple AETs in the stream splitter has been improved to use a table.
