Release Notes

mint.jar 1.24.00

(Released 05/04/2022)

DICOM Output Nodes

Fixed a status check error on the proxy CMOVE reading.

Fixed done status issue in the simple dicom output node.

DICOM Caching Output Node

New node to cache DICOM files for better error handling when something breaks mid-send to the destination.

Override methods used by DicomOutput node to create pass throughs for queries etc.

DB Node MS SQL Server Update

Modified the location of the query check code.

Updated the key lookup for the image path to allow for just the column name as the key and not require the table name.

Turned off message saving in the DB by default and added an option to enable it. Only store messages in DB if enabled.

General Bug Fixes

Fixed a query lock from spot bugs in splitter node.

Fixed a static sync issue in Mint Factory.

Updated build for release rather than source.
