

## Release Notes

### **mint.jar 1.24.07**

(Released 30/11/2022)

#### **Tag Mapper Node**

Added in a specific sequence editing option to the Tag Mapper Node. This allows a tag in a sequence to be set to a specific value. The rule, if applied to sequences will edit all instances of that tag in all sequences.

#### **Dose Node**

Added in dose recording from a CT Exposure Dose Sequence..

#### **Decompressor Node**

Fixed an issue with the planar configuration when decompressing RLE files. The tag should have been changed from 1 to 0 after decompression.
