Release Notes

mint.jar 1.24.15
(Released 03/07/2023)

Exec Node
Updated the processing to better handle a script failing to respond with an exit code. The system will now still try to look for result files.

Tag Mapper Node – Sequence Values
Added the option to set a DICOM tag using a value from within a sequence or sub-sequence.

Multi-frame Secondary Capture Splitter Node
Created a new node to split the multi-frame secondary captures that are created from PDF in DICOM explorer.
