## Release Notes

**cloe.js.gz**

**nexus.jar 2.21.05**

**mint.jar 1.23.04**

**pacsoology.jar 1.18.04**

**pjk.jar 1.17.05**

(Released 07/01/2022)

### DTI

Created a new class to act as an adapter between apps and an external websocket connection to the desktop helper app for receiving study context change events from URL calls.

Implemented the display control for the reporter class for context changed events to set the search bar and query for the study and auto load the report page for a single result.

Added a DTI status label to the reporting tool.

Altered DTI ws connector to try different ports.

### Bug Fixes

Added the return to the query page after verifying a report for the reporter app.

Modified the changing reporter and transcriber to create an AppUser.

### UI

#### Workflow Management Service

Made the general config tab scrollable.

Added in an option to turn off the HL7 output from the workflow controller.
