Release Notes

cloe.js.gz
nexus.jar 3.02.00
mint.jar 1.24.07
pacsology.jar 1.21.01
pjk.jar 1.19.06
(Released 30/11/2022)

Anonymisation Node UI (requires broker.jar)
Better handling of Anon record delete requests.
Added option to delete all records in a trial.
Added option to download the tag specific anonymisation rules and to be able to drag and drop that file onto another trial to effectively copy over the anonymisation tag rules between trials.
Updated the record query and update to display the updated table after changes.

Tag Mapper Node UI
Added an option in the SET rules to change the tag value in a sequence. If the sequence option is set, all instances of the tag are modified in all sequences.

Dose Node UI
Added options for recording dose from a CT Dose Exposure Sequence in a Summary File.
