Release Notes

pjk.jar 1.05.00

(Released 08/08/2018)

Follow Up Query Worklist Query Type

Added a follow up query to the known query types.

JSON Formatting Issue

Fixed an error when formatting DB results into JSON for a HTTP response.

JavaScript HTTP Content Factory Method

Added a new factory method to the HTTP class for creating responses that are JavaScript.

ImageFactory Refactoring

Extracted some methods from the DicomTagList to another interface for it to extend so that those methods can be used by the util package which can't depend on the dicom package.

ImageFactory Color Palette

Added "color palette" decoding to the ImageFactory.

Leading 0's on UID Components.

Modified the factory method for creating new UIDs because the old algorithm allowed leading 0's, which it now does not.
