Release Notes

pjk.jar 1.09.00

(Released 11/01/2019)

New Dicom Sorter

Added a new tag list sorter for sorting images in a series into the correct order for viewing based on the header information.

Error Logging of Incorrect AETs

Fixed an issue with the called and calling error descriptions being the wrong way round for the error codes when an association is rejected because of the called or calling AET not being recognised.

Slope Intercept Normalisation

Moved the methods converting bytes to shorts from the DicomTagAndLength to the ImageFactory class and updated references in DTVS.

Added method for normalising the slope and intercept to ImageFactory.
