Release Notes

pjk.jar 1.15.12
(Released 16/11/20)

Tag and Image Sizes

There are some max sizes configured in the Dicom Streaming Service that had hard coded defaults. These have now been increased but they can also be set in the service is they need to be increased by setting the properties :

      dicomservice.maximagesize
      dicomservice.maxtaglength

The values should by in bytes, so for 100Mb set 104,857,600
