Release Notes

pacsology.jar 1.08.00
(Released 15/10/2018)

MySQL Indexing Change

Older versions of MySQL don't return some fields used in assessing if the database schema is up to date and could result in the database not being initialised. If the fields are missing, the checks are ignored.

JDK 10 Code Update

Modified some calls to methods that were deprecated in JDK 8 and 9 to update the code for JDK10.

New Security Signing Certificate

Signed using the latest Pukka-j signing certificate.
