Release Notes

pacsoology.jar 1.17.00

(Released 28/02/2020)

Email Service

Added new tables for email jobs and attachments.

Added in SMTP service settings.

New model objects for email and attachments.

New email service for processing jobs and factory class for creating jobs.

New PDF Factory for creating PDF attachments for emails.

PID Issuer in DICOM Query Response

If there was an issuer on the Patient ID in the database, this could be included in the DICOM query response, which some systems didn't like. The query result filter now removes the issuer from the PID if it is present.

User Preferences Editing

The ability for the users and administrators to be able to set a default signature for a user when reporting was added.
