Release Notes

pacsoology.jar 1.17.08

(Released 21/10/2020)

PDF Report Creator Update

Generalised the layout parameters for the PDF report creation in the server factory.

App Entry Point Handler

Created a new class to allow the html entry points to be served out as a menu to allow the user to select which app to launch from a list rather than having to remember each URL.

Event Table Data Column Size

Updated the database schema for the EventTable to change the EventData column to a MediumText object from a VARCHAR(256) as data being stored in there needs more capacity.
