Release Notes

pacsology.jar 1.18.06
(Released 27/01/2022)

Workflow Management
Fixed the issue where a duplicate IP message could be sent for an unsolicited DICOM file.
Added escapes to the exam description for the workflow messages.
Fixed an issue where the workflow job status could be set to complete when a DicomImportJob failed.
Allowed for primary accession number matches to be multi study.
Allow cancelled and failed jobs to be reset for those displayed in the status page.
Added in the option to remove CR and LF from study description.
