Release Notes

pacsoology.jar 1.21.05

(Released 21/03/2023)

Workflow Management Service – Prior Selection

Updated the config to allow two property files, “default” and “custom” for the prior selection matching tool.

HL7 Objects

Added in the setting of the study UID for an order if it is in a HL7 message.

If an order is created in a report from the same HL7 message, pass the mappings to the order too.

Added in "REPORTED" status to the workflow constants.

Changed order insert in db connector not fail if an error occurs inserting a tertiary table like Exam.

Updated the Entity class to take the AET from comp 0 in the OBR field it uses for the entity ID.

Added code to get a Note object from a DB entry Map.

Added an alternate study date lookup and fixed an issue with the segment ID for the accession number default.

Fixed a default pointer for the notes lookup in the OBR (Not ORC) segment.

Added an alternate lookup to the OBX 11 field for report status if it is not in the OBR 25 field.

Include RQ and IP as unreported statuses.
